Mechanical and physical properties

Melting range	645 - 815 °C	Specific gravity	8,2 g/cm ³
Working temperature	710 °C	Tensile strength	250 N/mm ²
Electrical conductivity	5 Sm/mm ²	Elongation (I=5d)	8 %

Characteristics and typical fields of application

A 3005 EasyForm is a silver containing copper phosphorus brazing alloy with good flow behaviour and high ductility. It is suitable for gap brazing on copper, brass, tin bronze and gunmetal. It suits to brazingjoints-operated at temperatures between -60 $^{\circ}$ C and +150 $^{\circ}$ C, (determined by notched flexural impact tests according to DIN EN 10045). Do not use in sulphurous environment and on Fe- and Ni-alloys.

Heat sources

Flame, induction and resistance heating, TIG-torch

Flux

Only copper alloys require the use of flux

F 300 - Series
